GBEP WEBINAR SERIES 2023

Co-benefits of biogas and biomethane

Promoting anaerobic digestion for waste management

Tuesday 16 May 2023

10:00-11:00 CEST (UTC+2)

Register here

Overview

Management and disposal of wastes is a major global problem. Anaerobic digestion offers opportunities not only to minimise waste volumes but also to recover embodied energy in the form of biogas and biomethane.

This webinar will look at policy incentives that are available to increase the installation of biogas plants in Europe and provide a case study from France. Furthermore, the webinar will present a methodology for understanding the replicability of national policies so that the discussion can focus on the application of these practical and policy cases in other regions.

The webinar is hosted by the Global Bioenergy Partnership (GBEP) as part of the Scope of Work of Activity Group 7, under the thematic area of 'Biogas'. More information and other webinars on this theme can be found on the GBEP website.

Agenda

10:00 – 10:05	Brief introduction to webinar and presentation of speakers	*Constance Miller, GBEP Secretariat*
10:05 – 10:20	Policies to incentivize biogas production from wastes and residues – European case studies	*Lucile Sever, EBA*
10:20 – 10:30	Production of biomethane from agro-industrial wastes – case study of an innovative technology from France	*Geoffrey Karakachian, ENGIE*
10:30 – 10:40	MEETS Methodology – understanding the replicability of national biomethane policies	*Stefano Proietti, ISINNOVA*
10:40 – 11:00	Q&A and exchange of lessons learned	*Tiziana Pirelli, GBEP Secretariat*

Financially supported by the Italian Ministry of Environment and Energy Security

MINISTERO DELL'AMBIENTE E DELLA SICUREZZA ENERGETICA
